DIX'S WATER POWER PLAN Reservoirs Built with Private Capital Under State Control.

The Telegraph to The Tribune. Albany, Jan. 5.-Governor Dix in a statement to-day outlined his ideas as to what should be done to utilize the waters of the state, which he believes up to this time have been wasted. According to his plan, the reservoirs in the different watersheds should be built at the expense of the power users, and their bonds for the construction of dams, etc., should be guaranteed to the state after such users release to the state all of their title to surplus waters. The started a movement for lower steps on the honds the Governor would have run for trolley cars. The Governor believes that where it is proposed to construct a reservoir those interested in the improvement should be compelled to obtain the consent for such improvement of 95 per cent of the power users, who must agree to release to the state all storm waters and any possible claim they may have to use of those waters. He explained to-day that the purpose of the state agreeing to guarantee the bonds was to obtain money for the power users at 4 per cent, otherwise they would be compelled to pay a per cent.
